Beautifil® II

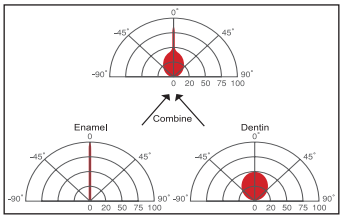
Nano-Hybrid, Universal Composite with Giomer Technology

Beautifil II

Nano-Hybrid, Universal Composite with Giomer Technology

AESTHETICS

As a nano-hybrid, **Beautifil II** offers superior strength and polishability. **Beautifil II's** unique filler structure combines the light transmission and diffusion properties of both dentin and enamel to blend well with surrounding dentition for picture perfect restorations.



Light transmission and diffusion properties of Beautifil II

SAY GOODBYE TO SECONDARY DECAY (GIOMER)

Shofu's exclusive GIOMER technology gives **Beautifil II** the ability to release and recharge fluoride and other beneficial ions for the life of the restoration. As a result of these bioactive properties, your patients receive healthful benefits unavailable in any competitor—anti-bacterial effect, acid neutralization, strengthen tooth structure and more! These benefits were validated by a clinical study at the University of Florida Dental School where no failures or decay were found in any of the restorations—*even after eight years!**

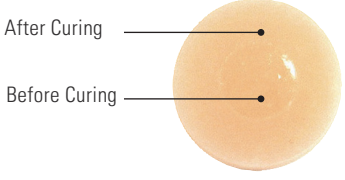
PHYSICAL PROPERTIES

The physical properties of **Beautifil II** are among the best available. Nano-hybrid aesthetics make it ideal for anterior restorations while high filler load, wear resistance and low shrinkage make it strong enough for posterior restorations. All of this, combined with non-sticky handling and the predictability of absolute shade stability makes **Beautifil II** the perfect restorative material.



Color Stable

- Filler Load: 83.3%
- Volumetric Shrinkage: <2.0%
- Radiopacity: 3.4 Al
- Wear Resistance 0.52%
- Natural Fluorescence.
