

Dura-Green® DIA

VITRIFIED-BONDED DIAMOND ABRASIVE

Photos courtesy of Mr. Yoshimi Nishimura, Japan

Dura-Green® DIA

Vitrified-bonded diamond abrasive, the diamond version of a carborundum point, is designed for contouring porcelains and ceramic copings with superior results. Dura-Green DIA provides enhanced performance with a smoother, chipless cut versus silicon carbide or diamond burs. Densely packed diamonds are embedded throughout (from the surface to the core) in a special glass binder offering extended cutting ability.

- Easily contours, better than carborundums
- Vitrified bonded diamond abrasive
- Improved cutting, reduced chipping
- Clean cutting & no metal residue
- Low cost per use

Dura-Green Dura-Green DIA

Use Dura-Green DIA stones for: Zirconia, Lithium Disilicate, IPS e.max, BruxZir & Hard Alloy

Order Information

- Part Number 0153 (HP) – CY5, KN7 & TC4
- Part Number 0166 (CA) – FL3, RD3 & TC2
- Part Number 0504 – Shofu Adjuster

Shofu Dental Corporation
1225 Stone Drive
San Marcos, CA
92078-4059, USA

CY5 - No. 70: Surface Adjustment
Effectively adjust the surface of the crown due to the excellent cutting performance

KN7 - No. 10: Framework Adjustment
Adjust the thickness of porcelain and ceramic copings

TC4 - No. 20: Detailed Finishing
Ideal for adjusting the ridges and occlusion

Press Dura-Green DIA against the Shofu Adjuster while rotating the abrasive

Finishing and Polishing
