### DURABLE DESIGN

Pro-Cut Diamonds are produced using Electro-Deposition Technology, which precisely distributes the right amount of diamond particles in an optimal size. This is achieved through a unique multi-coating technique applied to a single-piece stainless-steel shank. The result is enhanced durability, providing longevity and stability at higher speeds. Pro-Cut Diamonds are suitable for all cavity and crown preparations, as well as for the reduction or modification of various dental materials.

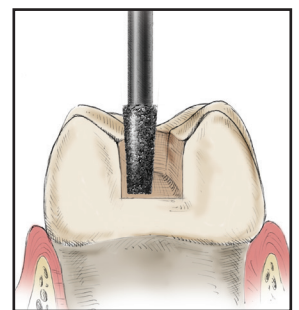

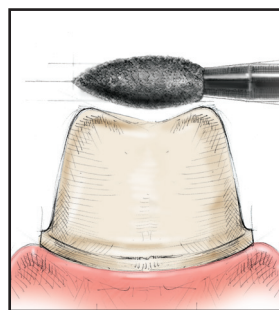

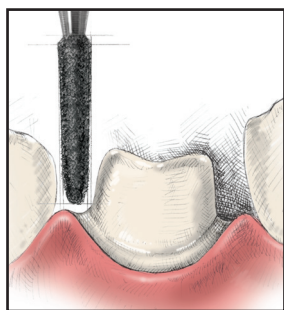

Electro-Deposition Technology

GRIT SIZE: ● EXTRA FINE ● FINE ● MEDIUM ● COARSE ● VERY COARSE

### EFFICIENT AND LONG-LASTING

Our multi-coating technique enhances cutting efficiency with reduced clogging, enabling precise and smooth operation—resulting in quicker prep times and greater comfort for the patient!

### SUPERIOR QUALITY AND VALUE

Pro-Cut Diamonds offer an impressive selection of 305 shapes, available in a variety of grits and sizes, including minimally invasive and short shank options. What's even better is that Pro-Cut Diamonds provide exceptional quality at a price point that is significantly lower than other leading brands of multi-use diamonds. You don't have to compromise on performance while enjoying substantial savings!
